Let's walk through the following steps. At the end of this lesson, you'll have made a simple Bootstrap powered web page that displays "Hello world" message in your web browser.

Step 1: Creating a Basic HTML file

Open up your favorite code editor and create a new HTML file. Start with an empty window and type the following code and save it as "basic.html" on your desktop.

Example

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="utf-8">
    <meta name="viewport"
            content="width=device-width, initial-scale=1">
    <title>Basic HTML File</title>
</head>
<body>
    <h1>Hello, world!</h1>
</body>
</html>
```

Tip: Always include the viewport `<meta>` tag inside the `<head>` section of your document to enable touch zooming and ensure proper rendering on mobile devices.

Step 2: Making this HTML File a Bootstrap Template

In order to make this plain HTML file a Bootstrap template, just include the Bootstrap CSS and JS files using their CDN links. Also, you should include JavaScript files at the bottom of the page, right before the closing `</body>` tag to improve the performance of your web pages.

Example

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="utf-8">
    <meta name="viewport"
                        content="width=device-width, initial-scale=1">
    <title>Basic Bootstrap Template</title>
    <!-- Bootstrap CSS -->
    <link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.0.2/dist/css/bootstrap.min.css"
rel="stylesheet"
integrity="sha384-EVSTQN3/azprG1Anm3QDgpJLIm9Nao0Yz1ztcQTwFspd3yD65VohhpuuCOmLAS
jC" crossorigin="anonymous">
</head>
<body>
    <h1>Hello, world!</h1>

    <!-- Bootstrap JS Bundle with Popper →
<script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.2/dist/js/bootstrap.bundle.min.j
s" integrity="sha384-MrcW6ZMFYlzcLA8Nl+NtUVF0sA7MsXsP1UyJoMp4YLEuNSfAP+JcXn/
tWtIaxVXM" crossorigin="anonymous"></script>
</body>
</html>
```

And we're all set! After adding the Bootstrap's CSS and JS files to our HTML page, we can begin to develop any responsive site or application with the Bootstrap framework.
