Bootstrap Carousel

In this lesson you will learn how to create carousels with Bootstrap.

Creating Carousels with Bootstrap

The carousel also known as slideshow or image slider is some of the best way of showcasing the huge amount of contents within a small space on the web pages. It is a dynamic presentation of contents where text and images are made visible or accessible to the user by cycling through several items.

The following example will show you how to build a simple carousel or slideshow with previous/next controls and indicators using the Bootstrap carousel plugin.

Example

```
<div id="myCarousel" class="carousel slide" data-bs-ride="carousel">
    <!-- Carousel indicators -->
    <ol class="carousel-indicators">
        <li data-bs-target="#myCarousel" data-bs-slide-to="0" class="active"></li>
        <li data-bs-target="#myCarousel" data-bs-slide-to="1"></li>
        <li data-bs-target="#myCarousel" data-bs-slide-to="2"></li>
    </ol>

    <!-- Wrapper for carousel items -->
    <div class="carousel-inner">
        <div class="carousel-item active">
            <img src="images/slide1.png" class="d-block w-100" alt="Slide 1">
        </div>
        <div class="carousel-item">
            <img src="images/slide2.png" class="d-block w-100" alt="Slide 2">
        </div>
        <div class="carousel-item">
            <img src="images/slide3.png" class="d-block w-100" alt="Slide 3">
        </div>
    </div>

    <!-- Carousel controls -->
    <a class="carousel-control-prev" href="#myCarousel" data-bs-slide="prev">
        <span class="carousel-control-prev-icon"></span>
```

```
    </a>
    <a class="carousel-control-next" href="#myCarousel" data-bs-slide="next">
        <span class="carousel-control-next-icon"></span>
    </a>
</div>
```

— The output of the above example will look something like this:

Creating Carousel with Captions

You can also add captions to carousel slides easily with the `.carousel-caption` element within any `.carousel-item`. You can optionally use display utility classes to hide captions on smaller viewports.

Let's try out the following example to understand how it basically works:

Example

```
<div id="myCarousel" class="carousel slide" data-bs-ride="carousel">
    <!-- Carousel indicators -->
    <ol class="carousel-indicators">
        <li data-bs-target="#myCarousel" data-bs-slide-to="0" class="active"></li>
        <li data-bs-target="#myCarousel" data-bs-slide-to="1"></li>
        <li data-bs-target="#myCarousel" data-bs-slide-to="2"></li>
    </ol>

    <!-- Wrapper for carousel items -->
    <div class="carousel-inner">
        <div class="carousel-item active">
            <img src="images/slide1.png" class="d-block w-100" alt="Slide 1">
            <div class="carousel-caption d-none d-md-block">
```

```
                <h5>First slide label</h5>
                <p>Some placeholder content for the first slide.</p>
            </div>
        </div>
        <div class="carousel-item">
            <img src="images/slide2.png" class="d-block w-100" alt="Slide 2">
            <div class="carousel-caption d-none d-md-block">
                <h5>Second slide label</h5>
                <p>Some placeholder content for the second slide.</p>
            </div>
        </div>
        <div class="carousel-item">
            <img src="images/slide3.png" class="d-block w-100" alt="Slide 3">
            <div class="carousel-caption d-none d-md-block">
                <h5>Third slide label</h5>
                <p>Some placeholder content for the third slide.</p>
            </div>
        </div>
    </div>

    <!-- Carousel controls -->
    <a class="carousel-control-prev" href="#myCarousel" data-bs-slide="prev">
        <span class="carousel-control-prev-icon"></span>
    </a>
    <a class="carousel-control-next" href="#myCarousel" data-bs-slide="next">
        <span class="carousel-control-next-icon"></span>
    </a>
</div>
```

— The output of the above example will look something like this:

NB:
For carousel to run we need to include below code at the bottom of our page

```
<!-- JavaScript Bundle with Popper -->
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.1.3/dist/js/bootstrap.bundle.min.js"
integrity="sha384-
ka7Sk0Gln4gmtz2MlQnikT1wXgYsOg+OMhuP+IlRH9sENBO0LRn5q+8nbTov4+1p"
crossorigin="anonymous"></script>
```
