Bootstrap Buttons

In this lesson you will learn how to create and modify buttons with Bootstrap.

Creating Buttons with Bootstrap

Buttons are the integral part of a website and application. They are used for various purposes like, submit or reset an HTML form, performing interactive actions such as showing or hiding something on a web page on click of the button, redirecting user to another page, and so on. Bootstrap provides a quick and easy way to create and customize the buttons.

Bootstrap Button Styles

Different classes are available in Bootstrap for styling the buttons as well as to indicate the different states or semantic. Button styles can be applied to any element. However, it is applied normally to the `<a>`, `<input>`, and `<button>` elements for the best rendering.

The following example will show you how to create different styles of buttons in Bootstrap:

Example

```
<button type="button" class="btn btn-primary">Primary</button>
<button type="button" class="btn btn-secondary">Secondary</button>
<button type="button" class="btn btn-success">Success</button>
<button type="button" class="btn btn-danger">Danger</button>
<button type="button" class="btn btn-warning">Warning</button>
<button type="button" class="btn btn-info">Info</button>
<button type="button" class="btn btn-dark">Dark</button>
<button type="button" class="btn btn-light">Light</button>
<button type="button" class="btn btn-link">Link</button>
```

— The output of the above example will look something like this: - > next page

Bootstrap Outline Buttons

You can also create outline buttons by replacing the button modifier classes, like this:

Example

```
<button type="button" class="btn btn-outline-primary">Primary</button>
<button type="button" class="btn btn-outline-secondary">Secondary</button>
<button type="button" class="btn btn-outline-success">Success</button>
<button type="button" class="btn btn-outline-danger">Danger</button>
<button type="button" class="btn btn-outline-warning">Warning</button>
<button type="button" class="btn btn-outline-info">Info</button>
<button type="button" class="btn btn-outline-dark">Dark</button>
<button type="button" class="btn btn-outline-light">Light</button>
```

— The output of the above example will look something like this:

Changing the Sizes of Buttons

Bootstrap gives you option further to scaling a button up or down.

To make buttons larger add an extra class `.btn-lg` to the buttons, like this:

Example

```
<button type="button" class="btn btn-primary btn-lg">Large button</button>
<button type="button" class="btn btn-secondary btn-lg">Large button</button>
```

— The output of the above example will look something like this:→next page

Similarly, to make buttons smaller add an extra class `.btn-sm` to the buttons, like this:

Example

```
<button type="button" class="btn btn-primary btn-sm">Small
button</button>
<button type="button" class="btn btn-secondary btn-sm">Small
button</button>
```

— The output of the above example will look something like this:
