Bootstrap Badges

In this lesson you will learn how to create badges with Bootstrap.

Creating Badges with Bootstrap

Badges are generally used to indicate some valuable information on the web pages such as important heading, warning messages, notification counter, etc.

The following example will show you how to create inline badges using the Bootstrap.

Example

```
<h1>Bootstrap heading <span class="badge bg-secondary">New</span></h1>
<h2>Bootstrap heading <span class="badge bg-secondary">New</span></h2>
<h3>Bootstrap heading <span class="badge bg-secondary">New</span></h3>
<h4>Bootstrap heading <span class="badge bg-secondary">New</span></h4>
<h5>Bootstrap heading <span class="badge bg-secondary">New</span></h5>
<h6>Bootstrap heading <span class="badge bg-secondary">New</span></h6>
```

— The output of the above example will look something like this:
